

My grandchildren and I listen to K-Love all the time, as they are from an unstable, broken home and never get the Christian influence except when they are with us. It is very important to us and very much a necessity. I can't even imagine what impact it would have on the Denver community if K-Love were displaced! Our society is very negative and corruptive these days, and as long as everybody has the option to hear positive music and ministry, I believe there can still be some control within our communities.
